STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS 1/ 2/

Total inventory of leaf tobacco higher than a year ago

Leaf tobacco inventories in the United States and Puerto Rico totaled 4,749 million pounds (farm-sales-weight) as of October 1, 1963, on the basis of the quarterly stocks reports of dealers and manufacturers. This is an increase of 144 million pounds compared with a year earlier (4,605 million). Tobacco growers marketed around 790 million pounds during the third quarter (July-September, 1963), consisting mostly of flue-cured but including some Maryland and cigar leaf. During the corresponding period last year 940 million pounds were marketed by growers.

The marketing year for all kinds of tobacco except flue-cured and cigar wrapper is on an October-September basis (table 3). The indicated total disappearance (exports plus domestic consumption) during the 1962-63 marketing year for all U. S. grown types combined for their respective periods was 2,028 million pounds, compared with 2,083 million during the previous year. Indicated domestic consumption of U. S. grown tobacco was 1,497 million pounds, slightly above the previous year, and the highest since 1953. In addition to the U. S. grown tobacco, approximately 167 million pounds (unstemmed equivalent) of imported tobacco was used by domestic manufacturers during the past year (171 million the year before). In turn, the U. S. exported 530 million pounds during the 1963 marketing year (590 million during the previous year).

Stocks as of October 1, 1963, included 724 million pounds (farm-sales-weight) of leaf tobacco under Government loans (558 million as of October 1, 1962). These loan stocks were divided as follows: Flue-cured, 542.2 million pounds; burley, 94.4 million; Maryland, 10.7 million; fire-cured, 35.9 million; dark air-cured, 17.8 million; and cigar-leaf, 23.2 million.

1/ Figures quoted for type totals in this summary are the farm-sales weight equivalent of reported stocks except foreign-grown leaf which is converted to an unstemmed equivalent basis only. (See tables in body of report for reported weight basis.) This report is issued quarterly.

2/ All Government loan stocks are reported by Grower Cooperatives, which are considered dealers for stocks-reporting purposes.

Flue-cured, Burley, and Maryland stocks show increases

Stocks of flue-cured tobacco on October 1, 1963, were 2,627 million pounds compared with 2,587 million reported on hand a year ago. Marketing of the 1963 crop, currently estimated at 1,309 million pounds, began in July, and sales by growers totaled around 775 million pounds by the end of September. During the corresponding quarter last year 928 million pounds were sold.

Burley stocks of 1,228 million pounds represented an increase of 91 million compared with the previous October 1 (1,137 million). Based on October 1 stocks, total disappearance of burley tobacco during the marketing year just ended (October 1962-September 1963) amounted to 584 million pounds compared with 570 million during the 1961-62 period. Indicated domestic consumption was 531 million pounds (up 6 million), and exports were 53 million (up 8 million).

Stocks of Maryland tobacco were 86.0 million pounds, an increase of 9.8 million from holdings on the previous October 1 (76.2 million). Sales of the 1962 crop on the auction markets were completed in July 1963. Disappearance of Maryland leaf during the 1962-63 marketing year was 29.6 million pounds, 3.1 million below the previous year. Domestic consumption amounted to 18.4 million pounds (20.7 million in 1961-62), and exports were 11.2 million (11.9 million in 1961-62).

Foreign-grown cigarette and smoking tobacco stocks (Turkish and other) were 264.7 million pounds--just under those of last October 1 (269.3 million).

1/ Totals include stocks of leaf reported in tobacco sheet. See separate reporting in tables 4 and 5.

2/ For factor used in converting weights see table 1 except for cigar leaf. The instructions for reporting unstemmed cigar-leaf of the domestic types require dealers and manufacturers to indicate the weight basis on which the tobacco is reported, namely farm-sales weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of the amount reported in these three categories. The conversion factors by types of tobacco for October 1, 1963 are as follows: Type 41, 103; Types 42-44, 111; Type 51, 104; Type 52, 104; Type 54, 103; Type 55, 104; Type 61, 109; Type 62, 111. October 1, 1963 figures subject to revision.

3/ For explanation of stocks included in this classification, see footnote 5 on page 15.

4/ Includes Types 31-V, 70 and 77, previously reported separately.

5/ Foreign-grown leaf is converted to an unstemmed equivalent basis only.

6/ Not reported separately prior to July 1, 1962.

1/ Annual disappearance for a type is calculated for the marketing year established for that type, the year beginning on the quarterly reporting date on which stocks of the type are at their lowest point and before the new crop enters stocks.

2/ The carry-over stocks have been tabulated separately according to broad groupings of ownership, namely manufacturers, under loan, and all other. "Other" reflects stocks reported by tobacco dealers and stocks held in the United States by representatives of foreign manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export.

3/ Subject to revision.

4/ November 1 estimate, U. S. Crop Reporting Board, SRS.

Table 4.--Stocks of leaf tobacco, including leaf in tobacco sheet 1/, by types and, where applicable, by groups of grades owned by dealers and manufacturers, October 1, 1963 compared with October 1, 1962, and July 1, 1963

1/ Represents leaf tobacco in stocks of reconstituted or processed tobacco sheet.
2/ Subject to revision.
3/ Summary according to groups of grades reflecting a broad quality breakdown of total cigar leaf stocks.
4/ Includes Puerto Rican on the Island, Type 46.
5/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.
* Revisions.

1/ Total includes stocks of leaf reported in tobacco sheet. See separate reporting in tables 4 and 5.

2/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis.

3/ This table should be considered as representing only the approximate quantities owned respectively by dealers and manufacturers. The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. All Government loan stocks are included as dealer holdings.

4/ Includes stocks on the Island of Puerto Rico.

5/ For explanation of stocks included in this classification see footnote 5 on page 15.

6/ Includes Types 31-V, 70 and 77, previously reported separately.
